## Remote Maintenance with voice streaming Solution $\quad C \in F \mathbb{F}$

## M-4132

The M-4132 module is specially designed for the remote maintenance solution with voice streaming. This module provides 2 major technologies on networking: Voice streaming and Pair connection. The Pair connection means that the user can operate remote COM port device via Ethernet TCP/IP protocol just like a local COM port and the Voice streaming means the user can talk to remote operator while operate remote COM-linked devices.

## Features

- Support voice streaming on network

Provide pair connection on network

Web-based administration

Linux 2.6 platform
